

Sponsorship packages

sufrá JETS™

We are looking for individual companies who are able to sponsor us throughout our journey.

As a team we are looking for a uniform/uniform printing, any amount of money (see sponsorship packages), and anything that you could provide to help us throughout our journey.

Is your company willing to help? Any contribution of any size welcome!

What are the sponsorship packages?

We have created a rough guide for you, if you were thinking about sponsoring us. You can use these to see if you can fill our requirements. If you are interested but don't fit a specific pack we would welcome any help and are happy to discuss what that could be!

Bronze

Bronze is our first package. In this you would sponsor us £20. We would use your logo on our portfolio and pit display, and talk about you and how you've helped us.

Sponsorship Packages

Silver

Silver is our second package which you would sponsor us £50. In this we would use your logo on our social media platforms as well as in our portfolio and pit display to show how much you have helped us.

Gold

The third package is the gold which would cost you £70. As a gold sponsor you will get shoutouts on our social media platforms as well as having your logo included on our portfolio, merchandise and pit display. We will also talk about you in our formal presentation.

Sponsorship packages

Platinum

Platinum costs £150. In this deal we will use your logo on our uniform as well as on our merchandise, portfolio and pit display. We will also give you permanent shoutouts on our social media platforms and discuss how much you have helped us in our formal presentation.

Diamond

Diamond costs £250. In this deal we will use your logo on all our materials including our uniform and will give you permanent shoutouts on our social media platforms and in our presentation. We will also publicise your sponsorship in the Valley Gardens school newsletter which goes to hundreds of school parents locally in Whitley Bay.

As an all girl engineering team one of our key aims is to **get more women and girls into engineering**. By sponsoring us you will be **helping the next generation**. Think of yourselves and your business **helping young women for their future**. You will get a lot of publicity as at the competition we will share your business and how much you inspired us. You will be rubbing shoulders with other local, national and international **businesses showing their commitment to promoting women's roles in engineering**.
